

Compliance with Environmental Laws and Regulations

We are committed to complying with all applicable environmental laws and regulations.

Conservation of Natural Resources

We strive to use natural resources responsibly, minimizing waste and promoting efficiency in our business processes through the adoption of sustainable technologies and practices.

Definition of objectives for improving environmental performance

We are committed to identifying and implementing measures aimed at improving environmental performance (e.g., reducing greenhouse gas emissions by adopting renewable energy sources).

Proper Waste Management

We adopt waste management practices aimed on reducing, recycling, and responsibly disposing of residual materials generated by our processes. We promote awareness among employees about the importance of recycling.

Awareness and Training

We provide ongoing training for our employees to raise awareness about the importance of environmental sustainability and the actions that each individual can take to contribute to our environmental commitment.

Collaboration with Stakeholders

We collaborate with customers, suppliers, and other stakeholders to jointly promote sustainable practices. We seek business partners who share our environmental values.

Quality, Consumption, and Management of water

Our environmental policy for water management focuses on quality, reducing consumption, and sustainable practices. We are committed to closely monitoring our water impact, adopting efficient technologies, and promoting conscious behaviors among our employees to ensure responsible use of water resources.

Air Quality

We adopt practices and technologies that minimize our impact on the surrounding air. We are committed to continuously monitoring emissions, taking measures to reduce them, and improving air quality in our operations.

Responsible Chemical Management

We are committed to using and handling chemicals in accordance with current regulations and following best safety practices. Our priority is to reduce environmental impact by promoting sustainability and ensuring safe and responsible management of chemicals in all our operations.

Soil Quality

We adopt a careful approach to soil quality by adopting sustainable practices to minimize potential degradation risks. Our corporate policy reflects our commitment to contributing to responsible management land resource.

Noise Emissions

We conduct monitoring to assess the acoustic impact of our activities and are committed to minimizing noise emissions in order to preserve the surrounding environment and the well-being of local communities.
